

Light Reflectivity

Ascendant™

All light reflectivity values listed are based on a percentage system, the higher the percentage (eg. 20-24, 35-39), the higher the light reflectance of the floor. It is measured per ASTM E1349, Standard Test Method for Reflectance Factor and Color by Spectrophotometry Using Bidirectional (45°:0° or 0°:45°) Geometry. Research indicates reflectance can help drive daylight further into space and reduce reliance on artificial lighting, resulting in reduced electricity usage and costs. Glare from flooring is a characteristic of glossy finishes, not reflectance. Flooring in lighter colors with a matte finish have high reflectance values, but do not add to glare. Flooring with light reflectivity values great than 25% can contribute to the LEED® Interior Lighting Credit.

Value	Sku #
0-9	PFS33391, PFS33671, PFS43391, PFS43671
10-14	PFS33866, PFS43866
15-19	PFS33361, PFS43361
20-24	PFS33352, PFS33600, PFS43352, PFS43600
25-29	--
30-34	PFS33363, PFS33677, PFS43363, PFS43677
